

Freedom Powered by Homecrest

Our Freedom Series is powered by the well established Homecrest Cabinetry brand in the United States. Homecrest was established in 1969 and 40 years later, Homecrest is a brand still in tune with the tastes of the time. It offers styles and finishes that bridge the gap between years past and trends forward. And continue to think of ways to make their cabinets better and sustainable.

Homecrest is a certified brand in the [Kitchen Cabinet Manufacturers Association \(KCMA\) Environmental Stewardship Program](#). The program recognizes companies that demonstrate an ongoing commitment to sustainability including the use of environmentally responsible materials in cabinet products and minimized environmental impacts realized through recycling wastes and using low emission coatings. By achieving this certification, Homecrest is going beyond minimum requirements and demonstrates leadership in growing a sustainable cabinet company.

Homecrest cabinetry is manufactured in the United States, and majority of its components are purchased within the U.S, but there are some components that are globally sourced.

By purchasing our Freedom Series, you can rest assured that you are getting good quality with affordable pricing because it's sourced from a reputable brand, and that is Homecrest.
